

Koustav Biswas

September 20, 2026

1 INTRODUCTION

Koustav Biswas studies at *BIT Mesra*. **Machine learning** *This subject is* interesting is an important field of Artificial Intelligence. It allows computers to learn patterns from data and make useful predictions.

Machine Learning is widely used in healthcare, finance, education, and transportation. **Good quality data helps Machine Learning models produce accurate and reliable results.**

It is also used in applications such as computer vision and natural language processing.

The various types of ML Algorithms are unsupervised, supervised and Reinforcement Learning

ML is what you need

2 Special Characters and Symbols

\$, &, %, @

3 Bullets and Numbering

- NLP
- LLM
- LSTM
- Web Development
 1. HTML
 2. CSS
 3. JS

4 Citations Testing

Networking is the invisible blueprint of the modern digital world, turning isolated hardware into a cohesive global web of instant communication [1]. By mastering routing protocols, firewall architecture, and packet flows, engineers can architect resilient systems that safely transport vast amounts of data across continents in mere milliseconds [2]. Utilizing online simulators bridges the gap between abstract theory and real-world deployment, allowing you to safely stress-test configurations and analyze traffic behaviors in a risk-free environment.

7 Wrapping Text Around Images

Figure 5: Machine Learning

Machine Learning is an important field of Artificial Intelligence. It allows computers to learn patterns from data and make useful predictions. Machine Learning is widely used in healthcare, finance, education, and transportation. Good quality data helps Machine Learning models produce accurate and reliable results. It is also used in applications such as computer vision and natural language processing. Changing r to l moves the image from the right side to the left side. When the image is placed on the left, the text flows around its right side. The paragraph layout changes according to the position of the image.

8 Another Wrapping

Good quality data helps Machine Learning models produce accurate and reliable results. It is also used in applications such as computer vision and natural language processing.

9 Four Images in a Grid

10 Artificial Intelligence in Healthcare

Artificial Intelligence (AI) is transforming the healthcare sector by supporting doctors, improving diagnosis, and assisting in patient care. Machine Learning models can analyze large amounts of medical data and identify useful patterns. AI-based systems are also used in medical image analysis, disease prediction, and personalized treatment planning.

Figure 8 illustrates the role of AI in healthcare. Medical imaging and predictive analytics are important applications of these technologies.

(d) Fourth image

Figure 7: Four images arranged in a 2-row, 2-column grid

AI can also support remote healthcare services and assist medical professionals in making informed decisions. However, the quality of medical data, patient privacy, security, and ethical considerations must be carefully addressed.

Human supervision remains important when AI systems are used in clinical environments.

13 Semester Result

14 Department-wise Student Results

15 Student Performance

16 Class Roll List

Table 1: Subject-wise Marks and Grades

Subject	Marks	Grade
Mathematics	95	A+
Computer Science	92	A+
Physics	85	A
English	78	B+

Table 2: Semester Result

Semester Result		
Subject	Marks	Grade
Mathematics	95	A+
Computer Science	92	A+

Table 5: Class Roll List

Roll No.	Name	Marks
1	Koustav	95
2	Rahul	88
3	Priya	92
4	Amit	81
5	Sneha	89
6	Arjun	76
7	Riya	94
8	Rohit	85
9	Ananya	91
10	Vivek	79
11	Pooja	87
12	Aditya	93
13	Neha	84
14	Suman	90
15	Tanvi	86

17 Machine Learning Results

Table 6 presents the performance of different Machine Learning algorithms.

Table 3: Department-wise Results

Department	Year	Students	Average Marks
CSE	1st Year	60	85
	2nd Year	55	88
ECE	1st Year	58	82
	2nd Year	52	86

Table 4: Subject-wise Marks and Grades

Subject	Marks	Grade
Mathematics	95	A+
Physics	85	A
English	78	B+
Computer Science	92	A+

Table 6: Machine Learning Model Performance

Machine Learning Results			
Algorithm	Accuracy (%)	Precision (%)	Recall (%)
Logistic Regression	91.2	89.5	86.8
Random Forest	94.1	92.8	90.6
Support Vector Machine	92.7	91.4	88.9
Decision Tree	89.6	87.3	84.5
